## 5 Installation Requirements

- DAVE v4.1.2 or higher version should be installed or use any other compiler tool chain supporting Infineon Technologies XMC Microcontrollers, e.g. Atollic, IAR, Keil MDK, Rowley, TASKING.

## 6 Known Limitations

XMC Lib	Limitation / Deviation
SDMMC	SDMMC driver tested with an SD card. , It wasn't tested with an MMC card (but it is expected that it works fine on MMC interface)
USBH (USB Host)	Host mode DMA operations are not supported.
USIC-I2S	Channel identification whether left or right using RBUFSR is not happening. Alternatively, user shall use the bit fields of DX2CR.DX2S, PSR.WA [IIS Mode] to identify the channel for Slave and Master respectively.
CCU	In XMC1400 devices, automatic shadow transfer feature is not supported with double module clock frequency (2MCLK).
ALL	When using Tasking compiler – recommended to use version 5.1r1 and above
